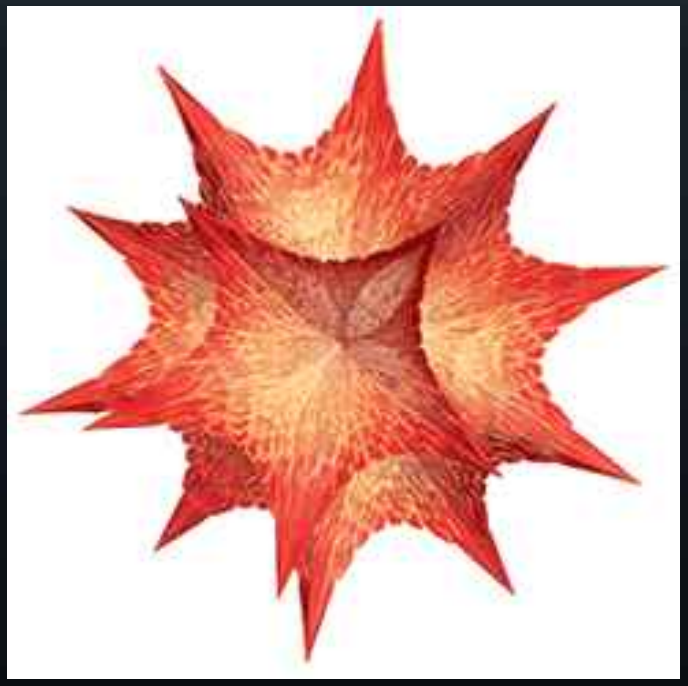
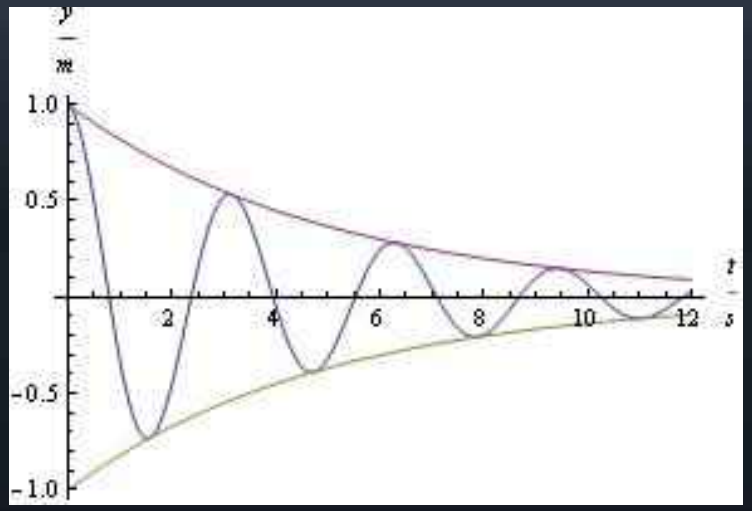
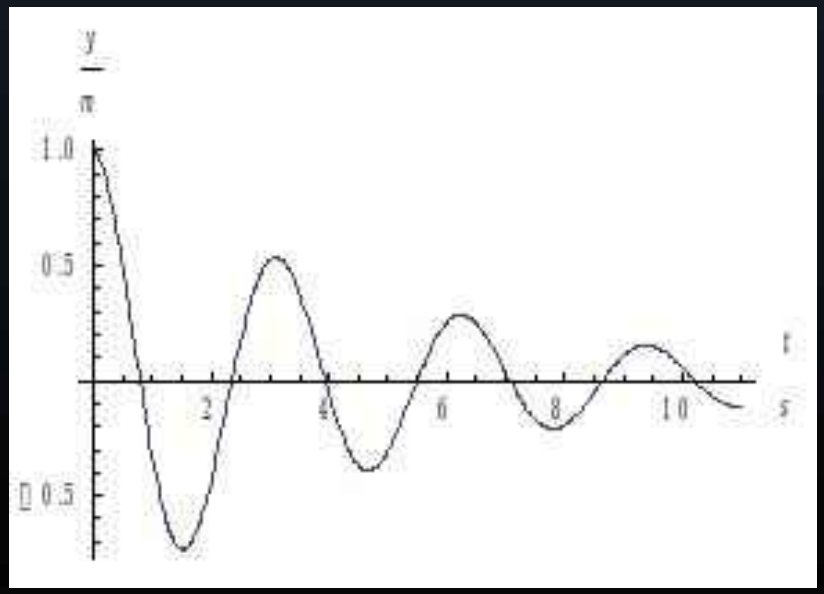
Wolfram Mathematica



- Technické a vědecké výpočty
- Řešení složitých numerických problémů
- Grafický i textový výstup

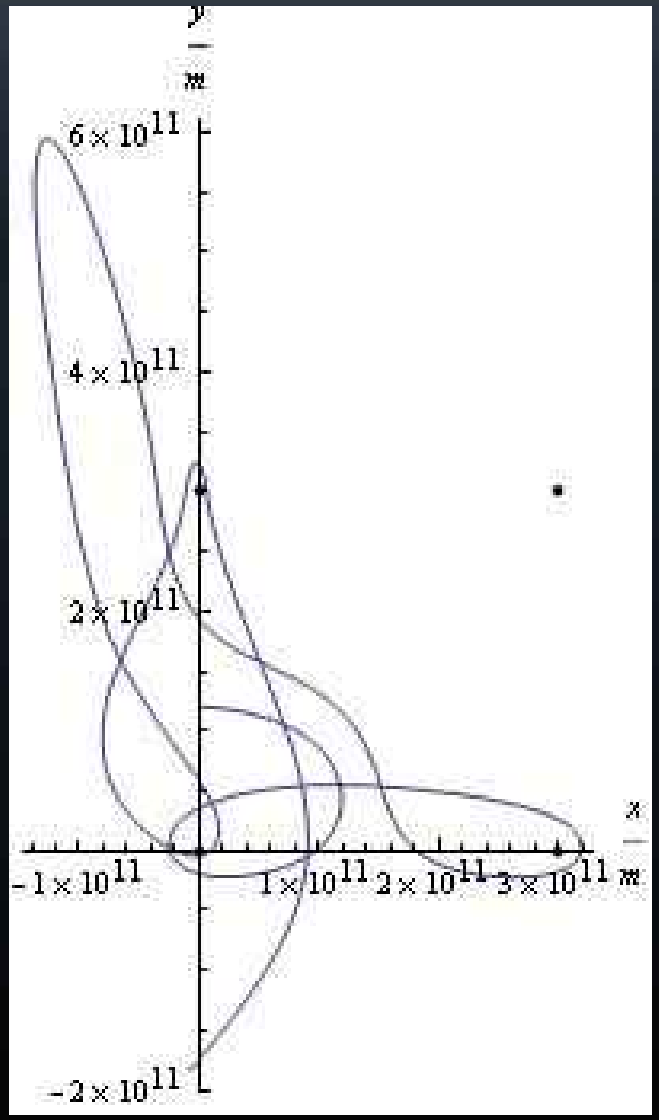
Tlumené kmity

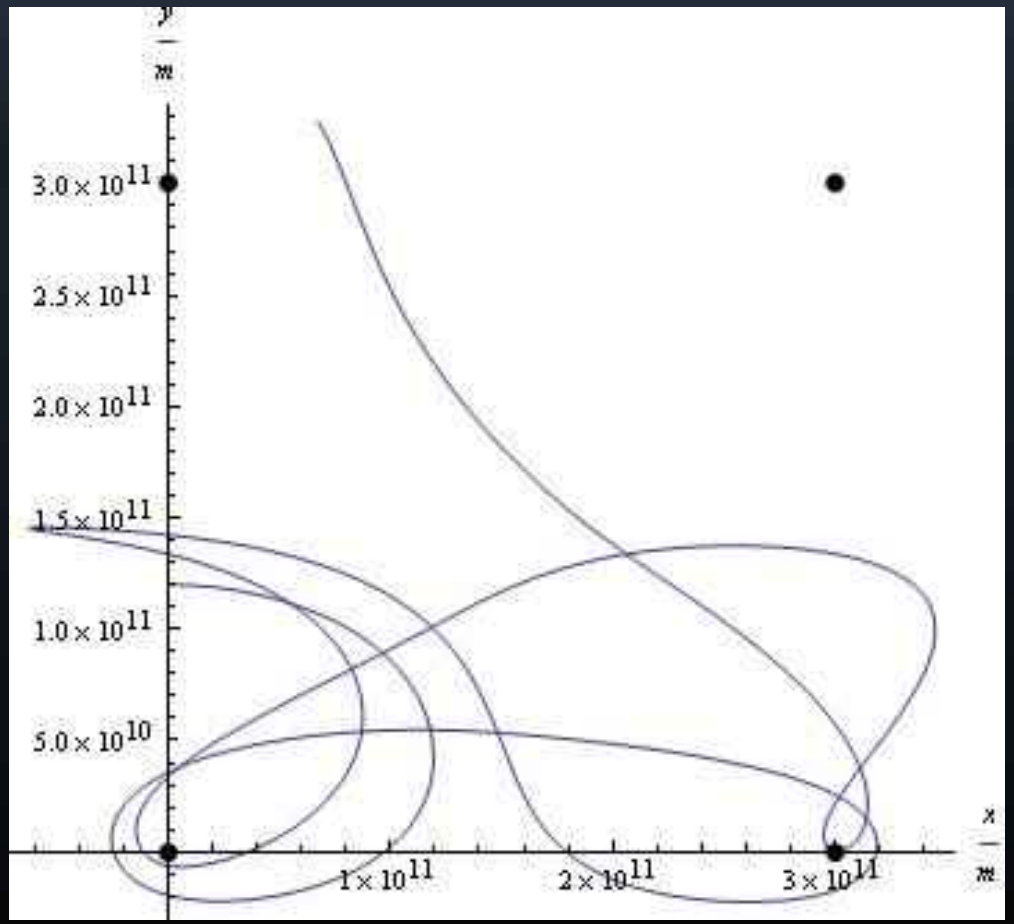




- Energie oscilátoru se disipuje do okolí
- Tlumené oscilátory například: závaží na pružině, kyvadlo
- Ztráty můžeme zanedbat nebo kompenzovat vnějšími silami

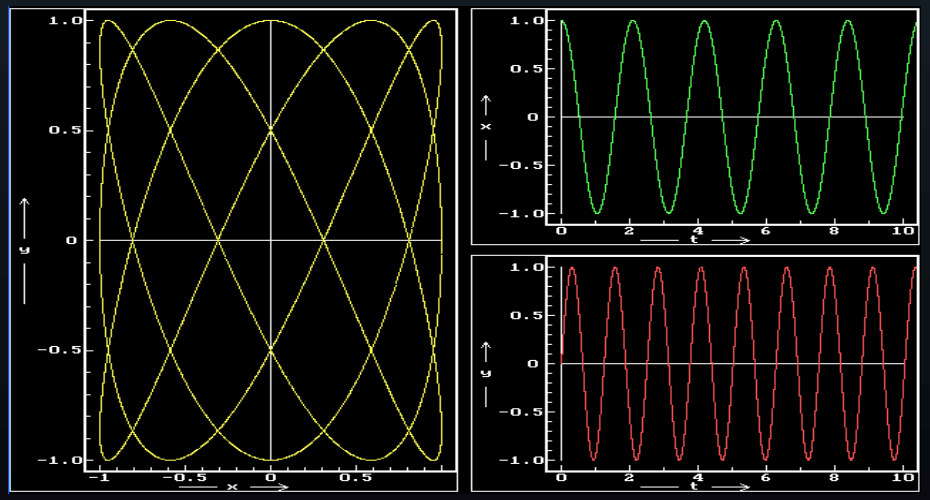
Pohyby v radiálním gravitačním poli

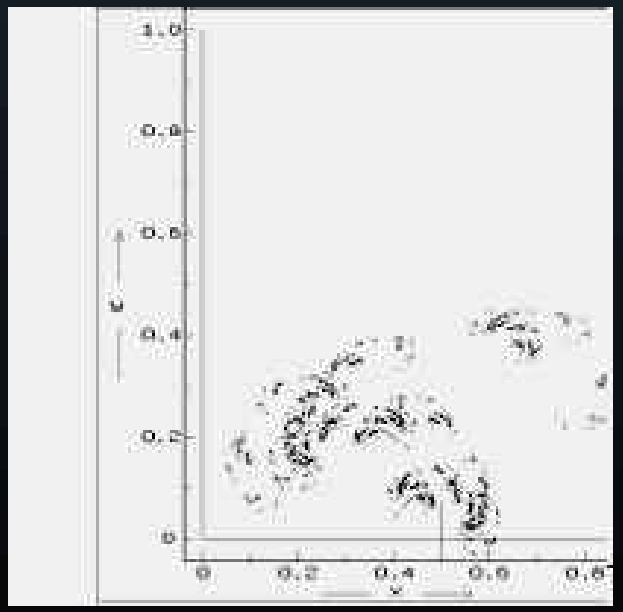




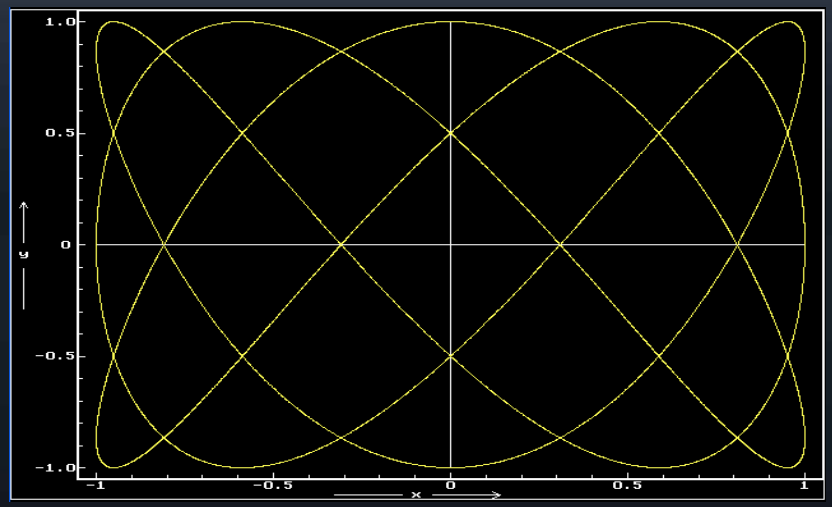
Famulus

- DOS, méně funkcí, problematický export obrázků, staré grafické rozhraní
- Intuitivní, vstupní kód podobný Pascalu

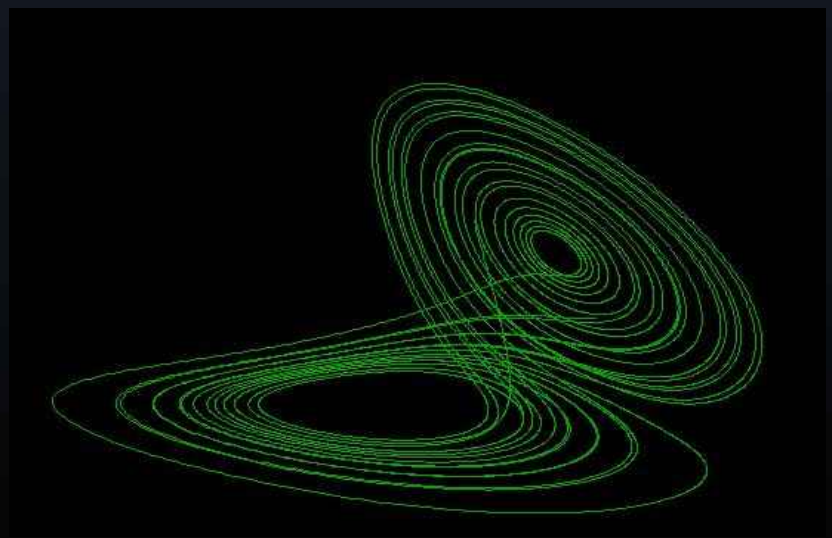


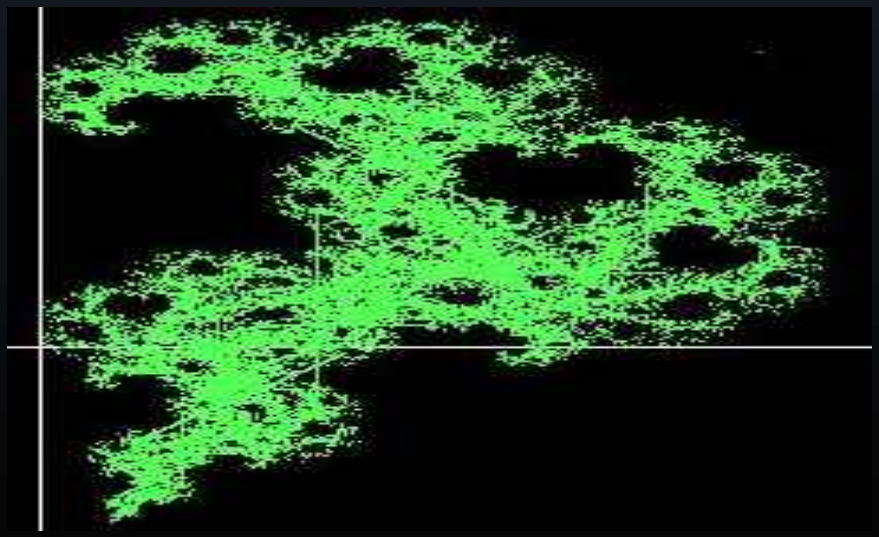


Možnosti Famulu



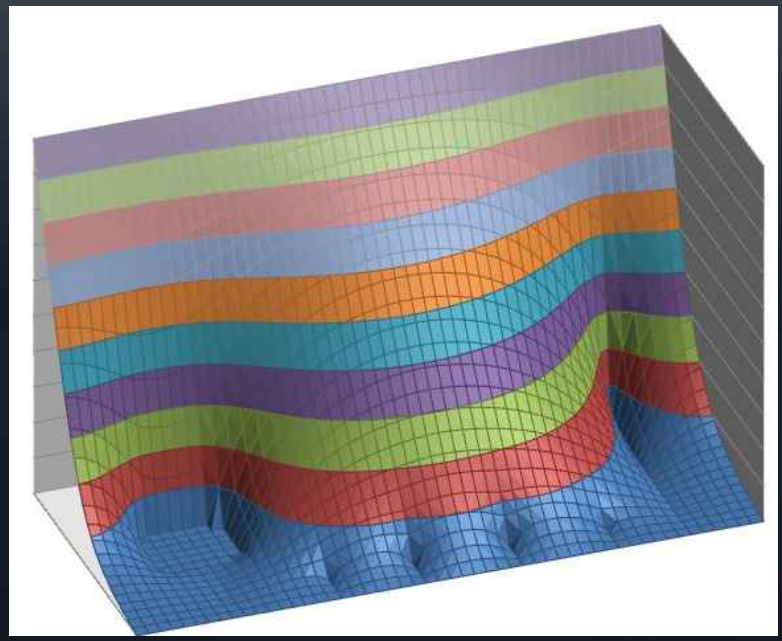
- Lissajousovy obrazce
- Fraktály (Lorenzův atraktor)

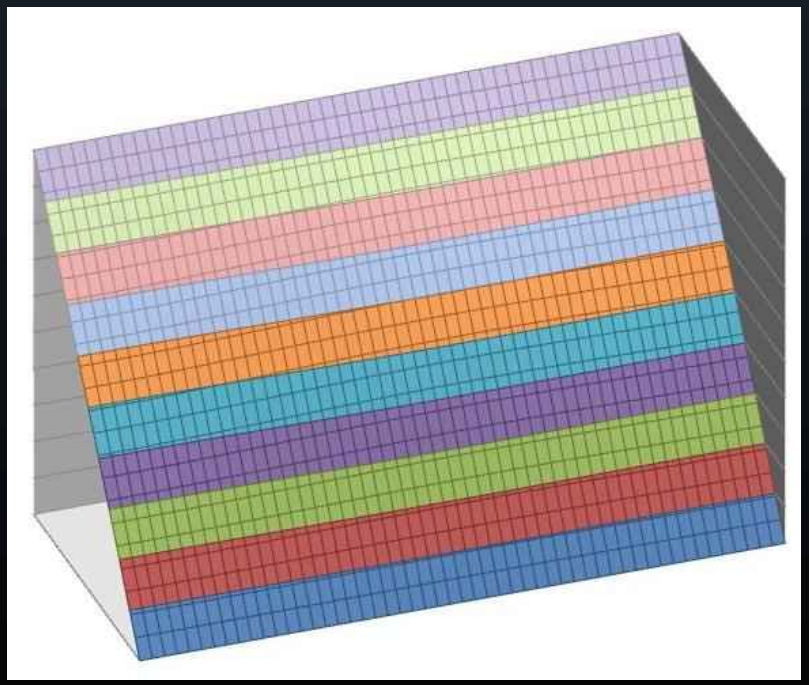


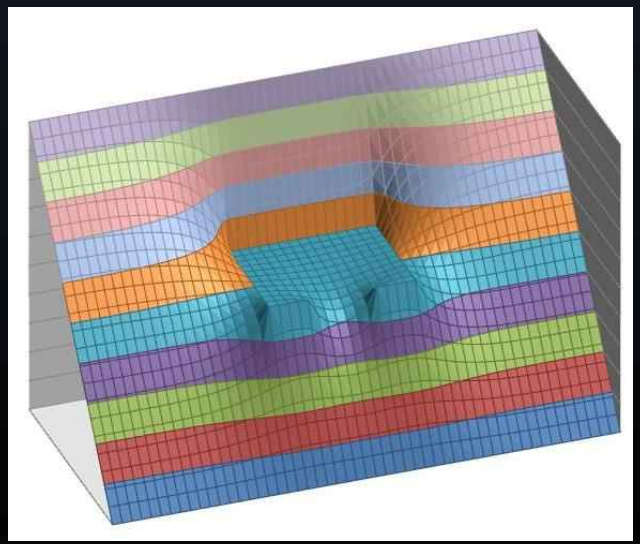


Tabulkový kalkulátor

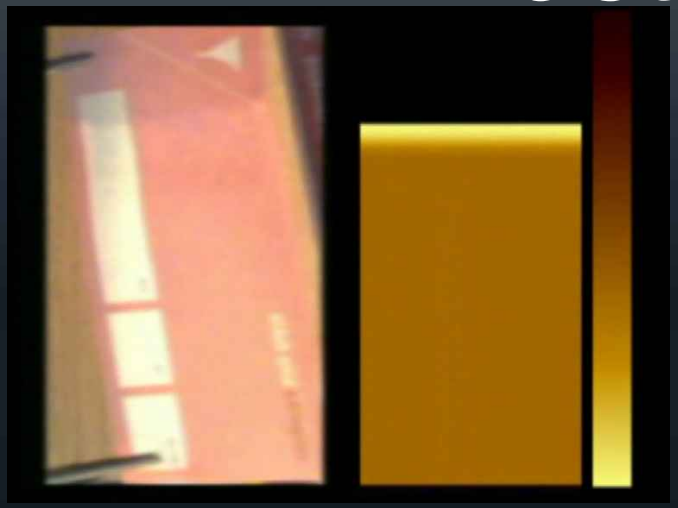
- Jednoduchý, dostupný
- Méně možností



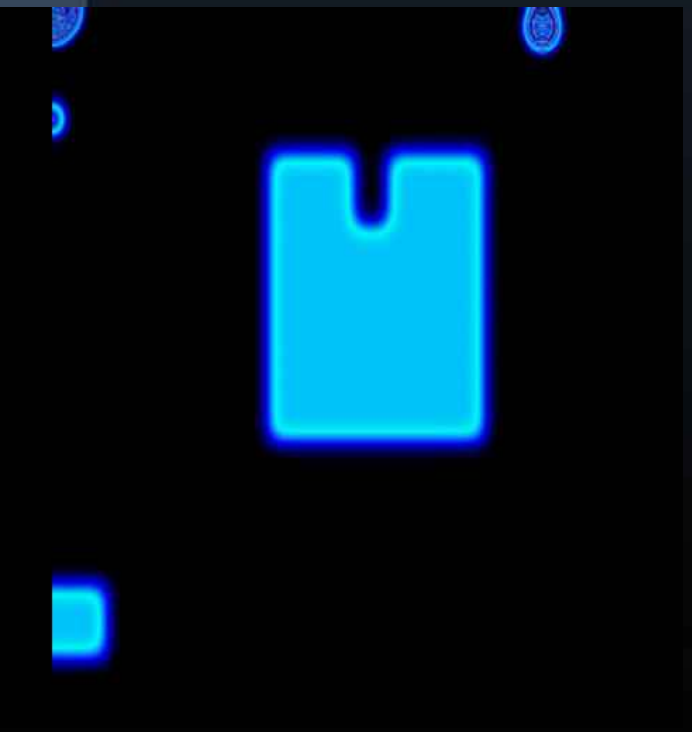


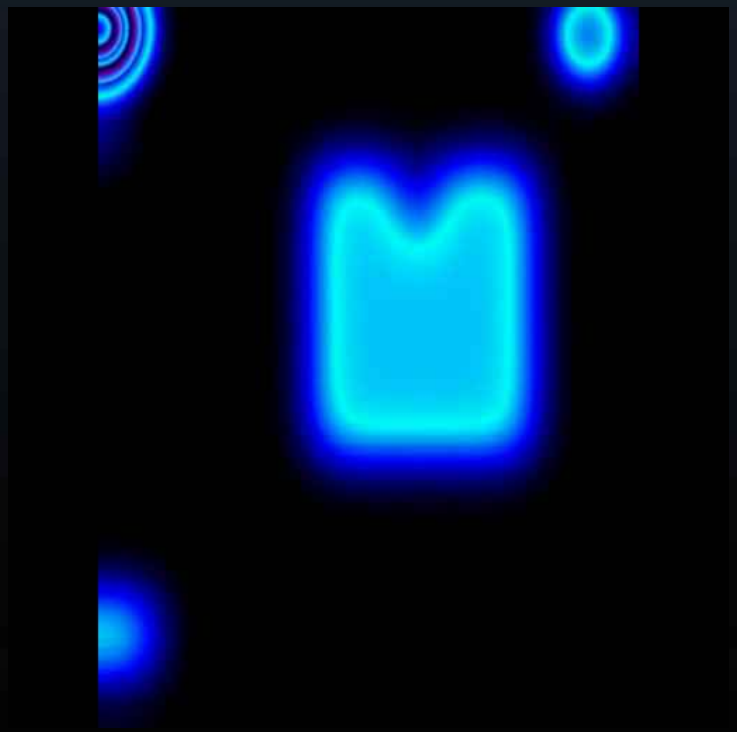


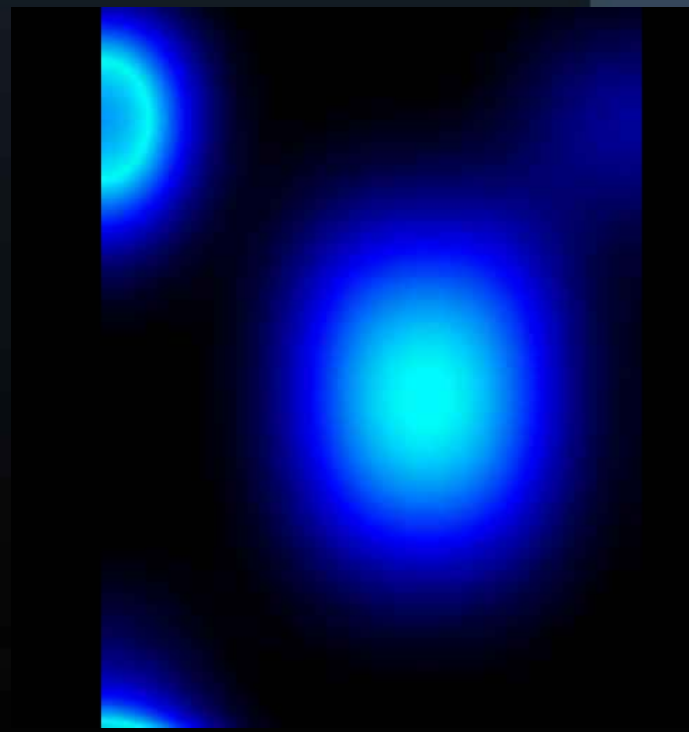
Vlastní program



- Specializovaný
- Složitější tvorba







Děkujeme

Za Vaši pozornost
